Installation Instructions:

Corksport LED Light Kit for 2011+ Mazda 2

How the Instructions Work

To best cover all of our customers experience levels and familiarity with the systems on their Mazda, we have broken our instructions down into numbered steps, each of which has the core information in the header with additional detail as needed depending on your experience. If you have a high level of experience, you can just use the checklist below and then skip to the step number where you need help or assistance. Video assistance may also be available for certain steps and is indicated by the HD icon:  Areas where there is a safety concern are indicated by the warning icon:  Cautionary areas (where parts are fragile, etc) are indicated by the caution icon:  Key tips are indicated with the light bulb icon: 

Overview/Checklist:

This is an overview of each of the steps of the build. You can use this as a reference and a checklist as you button up the work on the car.

1. Installing the 2011 Mazda 2 LED Light Kit - Interior

 Note: The LED's will only work in one direction. If the light does not work, remove and install the other direction

- 2f) Remove bulb & replace with one (1) 1156 amber LED turn signal bulb
- 2g) Reinstall bulb & socket by turning clockwise in housing
- 2h) Repeat steps d-g for the driver's side turn signal bulb
- 2i) Enjoy!

Installation Instructions: Corksport LED Light Kit 2011+ Mazda 2

1: Installing the CorkSport LED Light Kit

Note: The LED's will only work in one direction. If the LED does not work, remove and install the other direction.

A) Remove the clear plastic cover on the overhead dome light by prying lightly down on the clear cover in the location shown in **Figure 1**. The cover should then pop out.

B) Remove stock bulb and replace with one (1) 31mm LED Festoon.

C) Reinstall the cover.

D) Remove trunk light housing from interior panel (you may leave it plugged in). Remove trunk light by removing panel below light as shown in **Figure 2C**. Then reach up behind the light and push out on the right side of the light (shown in the red oval in **Figure 2A**). The housing should pop out as shown in **Figure 2B** below.

E) Remove stock bulb and replace with one (1) 31mm LED Festoon Bulb as shown in **Figure 2B** to the right.

F) Reinstall bulb housing by putting it back into hole and reinstalling the panel cover as shown in **Figure 2C** to the right.

2: Installing the Exterior CorkSport LED Light Kit

A) Remove the license plate light (1) by using a flat head screwdriver to unclip each side of the housing (shown in **Figure 3A**).

Note: Clips can break easily, so use caution when removing.

B) Twist the bulb counter-clockwise and remove the bulb from the socket. Replace with one (1) T10 wedge LED (**Figure 3B**).

C) Reinstall the license plate light housings as shown in **Figure 3A**.

D) Locate the passenger side turn signal (**Figure 4A**).

E) Twist the bulb socket counter-clockwise and remove bulb from housing (shown in **Figure 4B**).

F) Remove bulb and replace with one (1) 1156 amber LED turn signal bulb (Shown in **Figure 4C**).

G) Reinstall bulb and socket by turning clockwise in housing (shown in **Figure 4A**).

H) Repeat steps D-G for the driver's side turn signal bulb.

I) Enjoy!
