

CorkSport Mazda 3 and Mazdaspeed 3 Panel Filter

2004+ Mazda 3 and 2007+ Mazdaspeed 3

Thank you for purchasing the CorkSport High Flow Panel Filter. The CorkSport high flow panel filter provides increased flow with the factory intake and maintains full warranty compliance. Please let us know your feedback at: <http://www.corksport.com/corksport-high-flow-panel-air-filter.html>

Materials:

Parts List

One (1) CorkSport Dry Flow Panel Filter

Detailed Instructions:

1. Remove the Factory Air Filter

- Locate the Air Filter Box. Mazdaspeed3 shown in **Figure 1a** but Mazda3 will be similar.
 - Unsnap the clips holding the box closed. There is one on either side shown with red arrows in **Figure 1b**.
 - Pull Up on the lid of the box and move it towards the driver side fender. The box is held on the opposite side of the clips by two tabs. You need to move the lid enough to get by the tabs. Do not over stress the wiring circled in red.
-  Do not over stress the wiring circled in red in **Figure 1b**.
- Pull Out the Factory filter and replace it with the CorkSport Filter.
 - Connect the top of the box. Make sure the two tabs fit back into there slots.
 - Re-snap the clips on either side of the box.
